

# RFID Label Vials

Dipole manufactures RFID labels for vials in the healthcare and laboratory sectors. Optimized to resist special chemicals.

RFID vial tags use UHF technology (860-960 MHz) and are resistant to special chemicals found in hospitals or laboratories. They are customizable in size and materials, so their use is varied. Thanks to RFID labels for vials. You can optimize the procedures, streamlining the processes from the

beginning to the end. Gain reading speed in analysis. They have the international ISO 18000-6C standards and we offer personalized encoding and printing services.

## Product benefits

- Possibility of tracking the product
- Fully customizable
- Easy to use and application
- Worldwide delivery

## 01

**The applications and preferred uses of RFID tags are:**
