

Adept Tag

High-performance RAIN® RFID tags optimized for specific industrial purposes

One of the reasons HID has the largest product portfolio in the market is our ability to create custom-designed products to fit very specific customer needs. Sometimes these products remain custom for a specific application — but at other times they can become products marketed to our global customer base.

From strap attachment tags for large cylinders, via hang tags for cables, to high-memory passive RFID labels, steel-encased tags for very heavy industry and tiny, unobtrusive embedded tags, this family of industrial RFID tags is designed to meet specialty use cases and non-traditional applications.

The Adept tag range includes several examples of rugged, industrial custom products but is by no means an exhaustive list. For any special RFID needs, please inquire with us to learn how HID Global's proven custom design and manufacturing capabilities may help improving your specific use case.

KEY BENEFITS:

- Various form factors including ultra-rugged options
- Wide range of attachment options including steel band, welded, riveted, tethered, adhesive and wire rope
- Optimized for use on metal with options for US and EU frequency plus versatile 'global' versions.

TECHNOLOGY HIGHLIGHTS:

RAIN® RFID (UHF)

- Impact resistant housings
- Special design for cable or band attachments

Adept Tag

APPLICATION AREAS:

- Tagging gas cylinders and kegs
- Outdoor industrial applications
- Tagging pipes valves and fixed assets in oil and gas facilities
- Various use in harsh environments where heavy impacts are a regular occurrence
- Automotive applications
